

THE PUBLIC PRINTING.

---

ANNUAL REPORT  
OF THE  
SUPERINTENDENT OF PUBLIC PRINTING,  
SHOWING

*The condition of the Public Printing and Binding.*

---

JANUARY 16, 1866.—Laid on the table, ordered to be printed, and referred to the Committee on Printing.

---

OFFICE SUPERINTENDENT PUBLIC PRINTING,  
*Washington, January 16, 1866.*

SIR: Herewith is submitted the thirteenth annual report of this office, showing the condition of the public printing, binding, &c., in order that it may be laid before the House.

Very respectfully, your obedient servant,

JNO. D. DEFREES,  
*Superintendent of Public Printing.*

Hon. SCHUYLER COLFAX,  
*Speaker of the House of Representatives.*

---

OFFICE SUPERINTENDENT PUBLIC PRINTING,  
*Washington, January 16, 1866.*

The ninth section of the joint resolution approved on the 23d of June, 1860, authorizing the establishment of a printing office and bookbindery in this city for the execution of the public printing and binding, makes it the duty of the Superintendent to report annually to Congress "the exact condition of the public printing, binding and engraving, the amount and cost of all such printing, binding, and engraving, the amount and cost of all paper purchased for the same, and such further information as may be within his knowledge in regard to all matters connected therewith." And the second section of the same joint resolution directs that the Superintendent report annually to Congress "the number of hands employed, and the length of time each has been employed."

In compliance with these provisions, I have the honor to submit this report, with statements made up for the year ending on the 30th of September, 1865, as follows:

- No. 1. Printing for Congress and its cost (exclusive of paper and engravings) at the prices fixed by the printing act of 1852.
- No. 2. Printing for the Executive and Judicial Departments, at the same prices.
- No. 3. Showing the disbursements on account of the public printing, or the actual cost of the printing stated in Nos. 1 and 2, under the present system
- No. 4. Disbursements for paper for the public printing.
- No. 5. Disbursements for lithographing and engraving.
- No. 6. Disbursements on account of the public binding.
- No. 7. Showing the cost of the same binding at the prices paid previous to the establishment of the government bindery.
- No. 8. Number of hands employed, the length of time each has been employed, and the amount paid each.

#### THE BUILDING, MACHINERY, ETC.

The appropriation of \$61,000 made at the last session of Congress for increasing the size of the building used for the Government Printing Office and Bindery has been expended by the Secretary of the Interior and myself, in accordance with the provisions of law. The addition to the building is 60 by 75 feet, making the entire building 300 feet long, by a depth of from 60 to 75 feet, and four stories high, affording capacity for working nearly one thousand persons. The machinery added embraces twelve first-class Adams printing presses, manufactured by Messrs. Hoe & Co., of New York, at a cost of \$36,000. The establishment is now believed to be complete in all its departments, and capable of executing all the work required with great despatch. A detailed schedule of all the machinery and implements in the building would occupy too much space in a report of this character, but a list of the principal articles may not be deemed either inappropriate or uninteresting.

They are as follows, in the printing department: 35 Adams printing presses; 9 cylinder printing presses; 8 Gordon printing presses; 5 hydraulic presses, for dry pressing; 11 folding machines; 2 cutting machines.

In the binding department, there are: 17 standing presses; 14 ruling machines; 7 cutting machines; 3 numbering machines; 5 backing machines; 3 board cutters; 3 embossing presses; 1 smashing machine, and a large number of sewing benches, &c.

All this machinery is driven by one engine of forty horse-power and one of ten horse-power.

#### AGGREGATE DISBURSEMENTS

The following table will show the disbursements, under their appropriate headings, (the details of which are given in statements Nos. 3, 4, 5, and 6,)

during the year ending on the 30th of September, 1865, as compared with the corresponding years of 1862, 1863, and 1864, viz:

	1862.	1863.	1864.	1865.
Public printing.....	\$172,531 02	\$285,660 80	\$328,249 34	\$439,856 14
Paper for the public printing.....	206,437 21	*830,802 06	†713,481 16	‡1,258,959 51
Lithographing and engraving.....	23,739 27	64,126 38	75,391 79	96,907 04
Public binding.....	146,682 63	223,945 80	302,947 19	‡387,288 09
Total.....	549,390 13	1,404,539 04	1,420,069 48	2,183,010 78

\* The value of paper remaining on hand on the 30th September, 1863, was \$253,372 38.

† The value of paper remaining on hand on the 30th September, 1864, was \$130,565 83.

‡ The value of paper remaining on hand on the 30th September, 1865, was \$348,224 83.

§ The value of materials remaining on hand on the 30th September, 1865, was \$85,391.

With the very large amount of deferred printing which has accumulated in the office for the want of the necessary machinery for completing it promptly, the continued high price of paper and materials of all kinds, as well as in the advance of the cost of labor, it is not to be expected that the expenditures of this establishment can be reduced during the ensuing fiscal year. In the last annual report of this office, dated the 19th of January, 1865, it was stated "that the cost of the public printing and binding during the year ending on the 30th of September, 1865, unless very considerably reduced below the requirements of the preceding year, will approximate the very large sum of *two millions of dollars!*" The actual disbursements during the year, for labor and materials of all kinds, (exclusive of the amount appropriated for enlarging the building and new machinery,) was \$2,183,010 78. Deduct from this amount the cost of the paper and materials of all kinds (exclusive of machinery) on hand at the end of the year, \$433,615 93, and the sum of \$17,830 20 received for paper shavings, waste-paper, &c., sold, and the net cost of the public printing and binding for the year ending on the 30th of September, 1865, is shown to be \$1,731,565 65. The close of the rebellion has caused a considerable decrease in the requisitions of the Executive Departments for printing; but with the large amount of deferred printing for Congress and that which will be ordered at the present session, there will doubtless be enough to work the whole establishment up to its full capacity for the next two years.

#### CONDITION OF THE PUBLIC PRINTING.

The printing for the Executive Departments and their several bureaus, and for the Judicial Departments of the government, is furnished as expeditiously as required. The condition of the documents ordered by Congress is as follows:

*Report on the Eighth Census, in four quarto volumes.*—Three volumes of this work have been printed, and all but a portion of the third volume have been bound and delivered; these comprise 2,230 royal quarto pages, (mostly tabular, in small type,) of which 24,050 copies were printed. The remaining volume will make about 750 pages, one-fourth of which is in type. The printing of this

volume is necessarily suspended until the documents communicated to Congress at the commencement of the present session are completed. It will, however, be printed and bound before the adjournment.

*Reports of the Commissioner of Patents for 1863 and for 1864.*—The report for each year will make about 1,500 pages, to be bound in two volumes, of which 40,000 copies, in addition to the usual number, (1,550,) are ordered to be printed. For the report of 1863, the stereotype plates of explanations and the electrotype plates of illustrations of patents granted are ready for press, but no copies have yet been printed. The report for 1865 will be communicated to Congress at its present session, which will make three of these reports then on hand. Of the 40,000 extra copies ordered to be printed, 10,000 are for distribution by Senators, 20,000 by Representatives, and 10,000 by the Commissioner of Patents. The paper alone for the extra copies of each of these reports, at present prices, will cost \$65,000, or \$195,000 for the three, and the binding of them will cost not less than \$60,000. In view of the cost of these reports, and the length of time required to print and bind them, the expediency of reducing the number of copies is respectfully recommended for the consideration of Congress.

*Coast Survey Report for 1864, quarto.*—This will make a volume of about the usual size. The preparation of the maps and charts (of which there are 40 for this volume) is necessarily slow and tedious, and is the cause of the delay of its publication. It will be ready for distribution before the adjournment of Congress.

*Report of the Commissioner of Agriculture for 1864.*—The delivery of bound volumes of this report has recently been commenced, and will be continued as rapidly as possible. It is a work of very considerable magnitude. The present volume makes 676 pages, besides 48 pages of electrotyped illustrations, of which 156,580 copies are ordered to be printed. There will be required to complete it 7,770 reams of paper, costing \$125,211 50, and the exclusive use of eight of the largest presses in the office for six months.

*Memoirs accompanying the report of the Academy of Sciences.*—This volume will make about 400 quarto pages, of which 1,000 copies are to be printed. It is now in hand, but being mostly statistical, several months will be required to complete it.

*Army Register of Regulars and Volunteers.*—The joint resolution approved on the 30th of June, 1864, enacts "That the Secretary of War be, and he is hereby, authorized and required, in connexion with the Army Register for 1864, to cause to be printed and published a full roster or roll of all field, line, and staff officers of volunteers who have been in the army of the United States since the beginning of the present rebellion, showing whether they are yet in the service or have been discharged therefrom, and giving casualties and other explanations proper for such register. And to defray, in whole or in part, the expenses of this publication, an edition of fifty thousand copies of such enlarged register shall be published, and may be sold to officers, soldiers, or citizens, at a

price which shall not more than cover the actual cost of paper, printing, and binding, and shall not, in any case, exceed one dollar per volume." At the time of the enactment of this law it was expected that this register would make a single volume of moderate size, the cost of which would be about the price stated—one dollar. It is now ascertained that it will make four volumes of probably seven or eight hundred pages each, and will cost not less than one dollar and a half per volume to print and bind it, or the sum of \$300,000 for fifty thousand complete sets, being the number ordered to be printed. It will, however, be published in small editions, and no greater number of copies printed than are necessary to meet the demand for it. I am unable to say when either volume of this work will be ready for delivery, but it will be printed as fast as the manuscript is received in this office and the corrected proofsheets returned.

*Reports of the operations of the armies of the United States.*—The joint resolution approved on the 19th of May, 1864, directs the Secretary of War to "furnish the Superintendent of the Public Printing with copies of all such correspondence, by telegraph or otherwise, reports of commanding officers, and documents of every description in relation to the existing rebellion, to be found in the archives of his department since the first day of December, eighteen hundred and sixty, to the present time, and during the continuance of said rebellion, which may be, in his opinion, proper to be published with said correspondence, reports, and documents, which shall be published in their proper chronological order." A very large quantity of manuscript (embracing nearly all the battle reports for the years 1861 and 1862) has been furnished under this resolution, but I have yet been unable to commence printing it. It is contemplated to take it up as soon as the office is relieved from the pressure occasioned by the voluminous documents accompanying the annual message of the President to Congress, and to progress with it as rapidly as possible. Ten thousand copies, in addition to the usual number, (1,560,) are ordered to be printed. The estimated cost of printing and binding this work is one dollar and fifty cents per volume, or the sum of \$17,325 for the number of copies ordered (11,550) of each volume. The number of volumes required to complete the work cannot be stated with any degree of precision at this time, but, estimating them at twenty, their aggregate cost will approximate the sum of \$350,000.

Printed copies of the annual reports of the heads of departments and of some of the chiefs of bureaus were laid upon the tables of Senators and Representatives within a few days after the commencement of the present session, and the whole edition of the documents accompanying the annual message of the President will be completed at an early day. In the mean time the current printing for Congress and for the Executive and Judicial Departments of the government, owing to the increased facilities afforded by the enlargement of the printing office and the addition of new machinery, will be furnished with greater punctuality than ever before.

#### COST OF THE PUBLIC PRINTING.

The cost of the public printing executed during the year ending on the 30th of September, 1865, as compared with the amount the same printing would

have cost under the act of 1862, the system which immediately preceded the present, is as follows:

The printing executed during the year ending on the 30th of September, 1865, would have cost, under the act of 1852, (see statements Nos. 1 and 2,) the sum of .....	\$605, 381 97
The amount expended in the execution of this work, (see statement No. 3) was .....	439, 856 14
Showing a difference in favor of the present system of .....	<u>165, 525 83</u>

This result has been accomplished by the present system of executing the public printing, notwithstanding the great advance in the price of labor since it went into operation in March, 1861. At that time, and for several years previously, the wages of compositors and pressmen were fixed by their society at \$14 per week; in February, 1863, they were raised to \$16 per week; in December, 1863, to \$18 per week; in June, 1864, to \$21 per week; in November, 1864, to \$24 per week; and all other departments of labor have been increased in a corresponding ratio. The advanced price of labor was demanded and acceded to on account of the increased cost of living in this city, and is believed to be not too high for good workmen. It may be a question whether, under the old system, the public printer could have executed the printing at the prices fixed by law, with this heavy advance in the price of labor, but there can be no question that he would have made it the very reasonable cause for a demand upon Congress for increased pay. It is therefore manifest that the present system is better than its predecessor in a *pecuniary* point of view; that it is far better in the character of the work and the promptitude with which it has been executed during the last four years, with the limited facilities of the office, no one will deny.

#### PAPER FOR THE PUBLIC PRINTING.

The manner of procuring the paper for the public printing is provided for by law, and the law has been strictly adhered to in procuring it. Proposals were invited for furnishing it through the leading papers of the principal cities in the north and west for the length of time directed by law. At the recent letting (November 1, 1865) eighteen proposals were received, and the contracts were awarded to the lowest bidders in each class. The following table will show the prices for the year 1866, compared with the two preceding years:

	1864.	1865.	1866.
Printing paper, 1st class ..... per ream..	\$8 87½	\$15 50	\$13 75
Printing paper, 2d class ..... do.....	12 60	20 16	18 76
Printing paper, 3d class ..... do.....	12 00	19 50	19 00
Map paper ..... per pound..	27	45	40
Plate paper ..... do.....	30	45	.....
Writing paper ..... do.....	30 to 35	50 to 55	40
Paper for Post Office blanks..... do.....	14	30	27

In order to increase the competition for the paper required for the public printing, a joint resolution was passed at the second session of the thirty-eighth

Congress directing the Superintendent to purchase it "by accepting the sealed proposals of the lowest bidder, or bidders, for any specific portion, or portions, of the whole amount of any particular kind of paper required, *for either three months, six months, or one year*, the minimum portion to be specified by the Superintendent in his advertisement for proposals, and to be as low as will, in his judgment, most increase competition and be most advantageous to the United States." The results anticipated from this resolution were not realized at the recent letting—in every case the bidding for the smaller quantities of paper, "for either three months, six months, or one year," being considerably higher than were those for the whole quantity required for the entire year. I respectfully recommend that the joint resolution may be simplified by striking out the words in *italics*, thus allowing the reception of proposals either for the whole or a portion of the paper, in every class, for the entire year, but for no shorter period. This will permit manufacturers of paper of small capital and facilities to compete for contracts, and will accomplish all that can be accomplished by the law as it now stands.

It will be seen, by reference to statement No. 4, that the sum paid for paper for the public printing during the year ending on the 30th of September, 1865, amounted to \$1,235,566 19, and the indebtedness to the sum of \$23,393 32, making an aggregate amount of \$1,258,959 51. Of this amount there remained on hand paper which cost the sum of \$348,224 83.

#### LITHOGRAPHING AND ENGRAVING.

By reference to statement No. 5 it will be seen that the whole amount paid during the year for lithographing and engraving for Congress was \$60,274 60, of which \$47,947 50 was for illustrating the Patent Office Reports under contracts entered into under the direction of the Committee on Printing, \$4,650 59 for the maps accompanying the Coast Survey Report, and \$2,736 26 for engraving and electrotyping the illustrations for the Agricultural Report. The residue, \$4,940 65, was expended for numerous other documents communicated to Congress, as detailed in statement No. 5.

The engraving and printing for the War Department, consisting principally of commissions, warrants, and discharges for the regular and volunteer force, on parchment, and illustrations for works on military tactics, amounted, during the last year, to \$34,353 40, but the return of peace has already caused a very great decrease in the requisitions for this class of printing. These embrace all the lithographing and engraving executed for the government through this office. For drawing *fac simile* copies of the maps, plans, &c., accompanying the records of the Supreme Court of the United States, the sum of \$2,279 was paid during the last year.

There are numerous large and costly maps accompanying the "Reports of the Operations of the Armies of the United States," which, before being printed, will be submitted to the committee of Congress having exclusive control over such matters.

#### THE PUBLIC BINDING.

The binding of documents for Congress and of blank books has progressed in a very satisfactory manner, and the character of the binding will compare

favorably with that of any other establishment in the United States. The quantity of work executed during the year ending on the 30th of September, 1865, exceeded that of the preceding year, but, owing to a small decrease in the price of materials, its cost did not increase in a corresponding ratio. Thus, whilst the advance in the price of labor has increased in exactly the same proportion as in the printing department, (as shown on page 6 of this report,) and the cost of materials in a still greater proportion, the quantity of binding executed within the last year has cost much less than it would have cost under the contract system of previous periods.

It will be seen, by reference to statement No. 7, that the cost of the public binding for the year ending on the 30th of September, 1865, would have cost, under the contract system of five years ago, the sum of \$344,409 02; and that, as appears by statement No. 6, its actual cost, deducting the amount of materials on hand, was \$301,896 99, showing a saving in expense of \$42,512 27, in addition to which is the sum of \$8,915 10, (one-half of the proceeds of waste-paper, &c., sold during the year,) which, together with \$8,915 10, credited to printing account, making the total sum of \$17,830 20, has been deposited in the treasury, as required by law.

ADDITIONAL APPROPRIATIONS FOR THE PUBLIC PRINTING.

---

LETTER

FROM THE

SUPERINTENDENT OF PUBLIC PRINTING,

ASKING

*For additional appropriations for the public printing for the year ending  
June 30, 1866.*

---

DECEMBER 12, 1865.—Referred to the Committee on Appropriations and ordered to be printed.

---

OFFICE SUPERINTENDENT PUBLIC PRINTING,  
*Washington, December 11, 1865.*

SIR: I have the honor to request that the following additional appropriations may be made for the service of this office for the fiscal year ending on the 30th of June, 1866, viz:

To supply a deficiency in the appropriation for the *public printing*, one hundred and fifteen thousand dollars.

To supply a deficiency in the appropriation for *paper for the public printing*, four hundred and fifty thousand dollars.

To supply a deficiency in the appropriation for the *public binding*, ninety-five thousand dollars.

I also most respectfully repeat the request contained in my letter asking additional appropriations for the service of this office, dated on the 6th of December, 1864, [H. R. Ex. Doc. No. 4, 2d Sess. 38th Cong.,] that the clerical force of this office may be increased one additional clerk, at an annual salary of eighteen hundred dollars, from the 1st day of November, 1864. There were formerly four clerks employed in this office, but the number was reduced to three in 1860, upon the recommendation of the Superintendent.

The work of this office has been so greatly increased during the last four years that additional clerical force is absolutely necessary; and I am, therefore, reluctantly compelled to make this request.

Very respectfully, your obedient servant,

JNO. D. DEFREES,  
*Superintendent.*

Hon. SCHUYLER COLFAX,  
*Speaker of the House of Representatives.*
